WHAT'S AT STAKE

Fair Representation

Every 10 years, the results of the census are used to reapportion the House of Representatives, determining how many seats each state gets.

\$675 Billion

The distribution of more than \$675 billion every year in federal funds, grants and support to states, counties and communities are based on census data. That money is spent on schools, hospitals, roads, public works and other vital programs.

Quality of Life & Job Security

Residents use the census to support community initiatives involving legislation, quality-of-life and consumer advocacy. Local governments use the census for public safety and emergency preparedness. Businesses use census data to decide where to build factories, offices and stores, which create jobs. Real estate developers use the census to build new homes and revitalize old neighborhoods.

YOUR WORTH

2020 is the first year you can respond online. It's against the law for the Census Bureau to publicly release your responses in any way that could identify you or your household. Children are one of the most undercounted population, The citizenship question will not be on the census.
